

Gas Flue Weathering Tile GS - Multi

Application

The Gas Flue Weathering Tile from J.A. Plast is developed especially for leading outlets from gas installations etc. safely through the roof surface.

Please refer to national standards.

- For pitched roofs 15° – 45°
- Gas outlets Ø162/152/142/132/112 mm
- Can be manufactured for any profile

Design

The GS is supplied in 2 parts.

Installed on a base plate the bottom part is shaped to fit the roof profile 100%.

The top is adjusted by cutting to the wanted diameter and fixed at the actual roof pitch (15-45°) with the two enclosed self tapping screws.

The Gas Weathering Tile is easily installed with the rest of the roofing material and appears nicely integrated in the roof surface.

Colour and Surface

Special coloured, glossy or structured with sand of granules the vents can be supplied with a 100% colour and surface match individually adjusted to each roofing material.

Materials

The gas weathering tile is manufactured from HIPS (High Impact Polystyrene).

Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Remove plastic bag before placing in sunlight.

Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, www.japlast.com.
