

Roof Space Ventilation

J.A. Plast provides a wide range of vents and ventilation elements for ventilation of the roof space and batten cavity.

① Cowl Vents

Cowl vents, which are suitable for all types of roofing material. The discreet design leaves the vents nicely integrated in the roof surface.

② Tall Vents

Tall vents are suitable for efficient ventilation of the roof space and batten cavity – also in areas with heavy snowfall.

③ Integrated Vents

Almost invisible vents, with outlet integrated in the roofing profile or concealed under roofing material.

④ Ridge Vents and Elements

The product range includes vents for outlet through the ridge and ridge elements for continuous ventilation along the entire ridge.

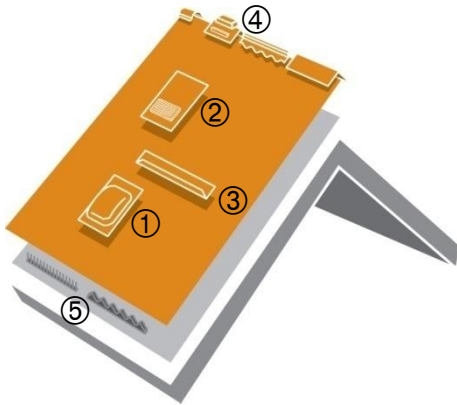

⑤ Eaves Closures

For installation at the eaves to provide an even airflow at the eaves and to function as bird stop.

Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, www.japlast.com.
