

Cowl Vent LV125

Application

The cowl vent LV125 from J.A. Plast is a discreet and efficient choice for ventilation of the roof space and batten cavity.

Please refer to national standards.

- For pitched roofs 15 – 45°
- 12,500 mm² ventilation area
- Can be manufactured for any profile

Design

The LV125 vent is designed with soft shapes letting it blend in with the roof surface. Rain water is diverted around the vent, and a built in protective grille keeps out insects and driving rain. The vent is supplied installed on a base plate shaped to fit the roof profile 100%.

Easily installed with the rest of the roofing material and always following the roof pitch, the vent presents a nicely integrated solution.

Colour and Surface

Special coloured, glossy or structured with sand or granules the vents can be supplied with a 100% colour and surface match individually adjusted to each roofing material.

Materials

The vent is manufactured from HIPS (High Impact Polystyrene).

Handling

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Remove plastic bag before placing in sunlight.

Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, www.japlast.com.
