

Cowl Vent LV200

Application

The cowl vent LV200 from J.A. Plast is a discreet and efficient choice for ventilation of the roof space and batten cavity.

Please refer to national standards.

- For pitched roofs 15° – 45°
- 20,000 mm² ventilation area
- Can be manufactured for any profile

Design

The LV200 vent is designed specially for climates with high relative air humidity, where ventilation is even more essential. It has a built in protective grille to keep out insects and drifting snow. The vent is supplied installed on a base plate shaped to fit the roof profile 100%.

Easily installed with the rest of the roofing material and always following the roof pitch the vent presents a nicely integrated solution.

Colour and Surface

Special coloured, glossy or structured with sand or granules the vents can be supplied with a 100% colour and surface match individually adjusted to each roofing material.

Materials

The vent is manufactured from HIPS (High Impact Polystyrene).

Handling
