

Invisible Vent INV100

Application

The INV100 vent from J.A. Plast is camouflaged to look like the original roofing material, which makes it almost invisible and particularly suitable for flat roofing profiles. The INV100 is a discreet choice for ventilation of the roof space and batten cavity.

Please refer to national standards.

- For pitched roofs min. 40°
- 10,000 mm² ventilation area
- Can be manufactured for shingle profiles only

Design

The INV100 vent is designed with a built in water stop concealed under the roof, which diverts rainwater safely back onto the roof surface. A protective grille keeps out insects and drifting snow.

Easily installed with the rest of the roofing material the vent presents a very discreet ventilation solution.

Colour and Surface

Special coloured, glossy or structured with sand or granules the vents can be supplied with a 100% colour and surface match individually adjusted to each shingle type.

Materials

Vent and adapter is manufactured from HIPS (High Impact Polystyrene).

Handling

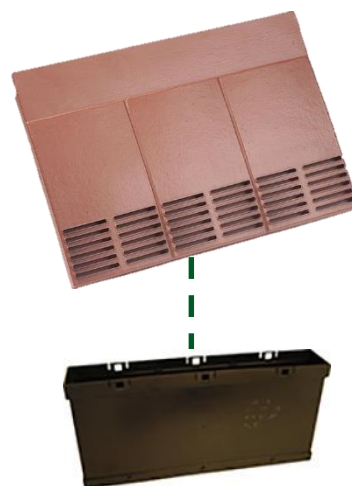

Keep in original packaging during transport.

Do not wrap and expose to heavy load during transport.

Remove plastic bag before placing in sunlight.

Accessories

INV100

FS7 Adapter

If necessary the INV100 can be extended with a FS7 adapter to reach into the roof space.

Roofing accessories supplied from J.A. Plast match roof profile, colour and surface 100%. The current product list and further information can be found on our homepage, www.japlast.com.
